

VALORANT DATA

Valorant is a free-to-play first-person tactical hero shooter developed and published by Riot Games.

About: This dataset is all the basic and advanced statistics from the last two International Valorant LAN tournaments, these statistics include Kills, Assists, expected Kills, and expected Assists and more.

Why this Data?: We are using this data specifically as we are figuring out which region is objectively the best, and this data is from the last two international tournaments, making this data the best to use in this situation.

How can it be used?: The stats we have in this dataset represent the kills, deaths, and assists, among many other advanced stats. With these stats we will be able to configure a score for each player, and then see where the player is from, and give a score to every region which would result in an objective best region.

When? This data takes from two international tournaments based in 2021 and 2023

Who cares?: The entirety of the valorant community cares about this outcome as every region believes they are the best, and with this data we can give an entire region bragging rights that they'll be able to flaunt until the next international tournament.

Total Stats for top 13 Players
